

# **BOEHRINGER INGELHEIM VETMEDICA** **& The North Carolina Animal & Rabies Control Association**

Invites Shelter Employees From Around the Region The  
***SHELTER MANAGEMENT WORKSHOP***  
*(Continuing Education, No Fees)*

## **Infectious Disease Control; A Practical Approach**

Providing healthy dogs and cats for adoption is the primary goal of animal shelters. Sounds simple, but it is not. Illnesses such as feline upper respiratory disease or canine parvovirus provide a constant threat, making it hard for shelters to keep their animal populations healthy. Animals with infectious diseases stay in shelters longer, place a greater strain on health care resources and hinder the organization's ability to provide services to other animals in need.

Why do dogs and cats contract infectious diseases? Is it bad luck or are there other explanations? Science tells us there are specific actions that increase the risk of contracting an infectious disease. Identifying those actions and minimize the risk of infectious disease transmissions is the goal of an effective infectious disease control plan.

***Boehringer Ingelheim is Proud to be working with the NC Animal/Rabies Control Association to bring you this workshop!***

There are specific actions that increase the risks of contracting an infectious disease.

**Speaker: LeMac' Morris, DVM, MPH, Dipl. ACVPM**  
**Please Join Us on January 5, 2012**

Registration 9:15am – 9:45am  
Workshop Hours, 10am-1:30pm  
Catered Lunch Will Be Served

**Wake Technical Community College**  
9101 Fayetteville Road, Raleigh, NC (On Highway 401, between Raleigh & Fuquay-Varina)  
Students' Services Building, 2<sup>nd</sup> Floor  
maincampus@waketech.edu

**RSVP to Debbie Sawyer**
